I'm a passionate software engineer with experience in both coding and project management. Over the years, I've enjoyed building software solutions that solve real world problems, while also managing teams and projects to make sure everything runs smoothly. I thrive on turning complex challenges into efficient, user friendly systems. Balancing the technical details with the bigger picture is what I do best, ensuring projects stay on track and deliver value. I'm always looking to learn, grow, and work with teams that value collaboration and creativity.

Education

- **High School Diploma** 2016
- Grenada High School | Grenada, MS
